

The TruStar logo is located in the top right corner of the image. It features the word "TruStar" in a bold, blue, sans-serif font, with a red star symbol integrated into the letter "a".

**BRAKE PADS**

**BRAKE SHOES**

**DRUMS & ROTORS**

**Choose wisely when choosing brake friction.** TruStar brake friction provides the excellence that installers have come to expect. Strict standards are met for our line of brake system parts. These are the best parts available to the aftermarket and we are pleased to offer them under the TruStar brand. Our patented brakes are proven to provide superior fade resistance and stopping power, our discs and drums are manufactured to faithfully match OEM parts and our "No Core" shoes are asbestos free. With part numbers available for most late model vehicles and new ones coming steadily to market we are poised to keep you supplied with all the parts you need for a trouble-free job.

TruStar brand ceramic, semi-metallic, and severe duty friction, manufactured using a patented shimming and pinning process, provides ultra smooth contact of pad to rotor surface reducing vibration. Every part number is integrally molded with factory installed shims guaranteeing that our pads are twice as strong as riveted pads.

Our non-asbestos brake shoes are manufactured to the highest standards and meet or exceed OEM specifications. As these are “No Core” shoes, there are no return procedures saving time, effort, and expense.

TruStar’s blended line of competitively priced drums and rotors are sourced globally. We use dedicated factories or original equipment manufactures to ensure consistent quality across the entire line. All pieces are inspected individually at the factory and meet SAE J431 standards.
