HUB BEARINGS

SEALS

Profitable seals, bearings, and hub assemblies bring more to your bottom line. In order to deliver quality parts at competitive prices, TruStar seals, bearings and hub assemblies are sourced and manufactured globally. By maintaining low-cost overhead and assuring a fast turn-around time, we bring exceptional value to our customers. With coverage of most passenger cars and light trucks and designs preferred by professional installers our seals and bearings are the best in the industry.

TruStar branded oil and grease seals, with over 725 part numbers and 95% coverage of passenger cars and light trucks, are designed to match brand name suppliers. They are manufactured to OE specifications by domestic OE suppliers and overseas ISO 9001 / 9002 / 9003 certified manufacturers.

Our tapered bearings are supplied by foreign and domestic ISO 9000/9001/9002 certified manufacturers.

TruStar's hub bearings cover over 200 SKU's representing 98% of sales. They are sourced from and assembled by global manufacturers. We offer new 3rd generation OE hub assemblies. Every ABS sensor and hub assembly is thoroughly tested to meet rigorous standards.
