**TRUSTAR
DISTRIBUTION
CENTER**

In an effort to provide our members the best products in a timely and cost reducing manner, TruStar has established the **TruStar Distribution Center**. Located in Richmond, VA., the distribution center has been well received by current members.

The products currently available from the TruStar Distribution Center are friction, calipers, bearings & seals, brake hardware, drums & rotors, brake hydraulics, clutches and filters. All of these products are packaged in TruStar boxes. Members can combine orders of these products to meet freight minimums. This saves TruStar members time, money and reduces inventory and increases turns.

TruStar has made available a Master Brake Catalog, offering parts from different manufacturers. Selling to installers and looking up parts is easier and less time consuming. This Master Brake Catalog, and accompanying CD, allows our members to offer products and programs that are not available to the industry. By creating the TruStar Master Brake Catalog and establishing the TruStar Distribution Center, TruStar provides the most complete brake program in the country.
